The "Alpine symbol" identifies winter tyres according to UNECE regulations (valid in the EU and various other countries) and the tyre regulations of the USA and Canada. The snow performance of these winter tyres has to be proven by objective tests and meet or exceed defined limits. These tyres provide high performance with regards to safety and control on snow, on icy roads and in general at deep temperatures.

LI = Load index
SI = Speed index
XL = Extra load
FR = Rim protection
SUV = Sport Utility Vehicle
* = SUV

Speed index:
Q = up to 160 km/h
R = up to 170 km/h
T = up to 190 km/h
H = up to 210 km/h
V = up to 240 km/h

EU label values: = Fuel efficiency = Wet grip, = External rolling noise (decibels) = Class

"Snow tyre" means a tyre whose tread pattern, tread compound or structure are primarily designed to achieve in snow conditions a performance better than that of a normal tyre with regard to its ability to initiate or maintain vehicle motion.

ALL-SEASON AND WINTER TYRES 2017/2018

PASSENGER CAR AND VAN

VIKING

Viking. A brand of Continental.

OUR VIKINGS:

Tough from tradition, especially in wintry conditions.

A reliable partner of high safety and excellent driving comfort even in tough Nordic winter conditions. Based on longtime experience and constant development in technical know-how, VIKING assures winter tyre technology of the highest level. Whether driving in the wet or on roads covered with mud, snow or ice: the VIKING winter tyre pattern responds to every road condition.

FourTech

The all-season tyre for compact- and middle-class cars.

► Perfect grip, short braking distances.

The solid shoulder blocks lead to an optimised transmission of traction and braking forces. This leads to short braking distances on dry roads.

► Efficient water drainage prevents aquaplaning.

The innovative tread pattern design allows efficient water drainage which improves aquaplaning performance and thus increases driving safety.

► High safety on snow.

The optimised sipe technology in the central part of the pattern offers more gripping edges for excellent braking performance and good grip on snow.

FourTech Van

The all-season tyre for transporter and vans.

► Excellent driving performance in wet conditions.

The tyre achieves excellent driving performance on wet roads. Its high strength results in balanced driving performance as well as improved braking and precise handling in wet conditions. Short stopping distances on wet roads and superb aquaplaning behaviour ensure a high level of safety.

► Excellent traction on snow.

Strong braking performance is achieved on snowy roads thanks to excellent traction behaviour and a solid grip on the surface.

► Safe cornering in all weather conditions.

The tyre sets the standard with faultless directional stability and safe cornering on dry, wet and snowy roads. Its robust design give the vehicle stable driving dynamics.

YOU CAN COUNT ON VIKING:

Quality from the North.

WinTech and WinTech Van deliver constant performance in fast changing weather conditions – excellent grip and driving stability are assured thanks to their innovative pattern and optimised silica technology. Our VIKINGS are at home in the Nordic regions and ensure a safe and comfortable driving experience especially in wintry conditions.

WinTech

For compact- and middle-class cars.

► Traction on snow.

The tread interlocks optimally with the snow - improving both starting and braking performance.

► Handling on snow.

The optimised grip ensures excellent steering. This makes for exceptional handling on snowy roads.

► Dry handling.

The robust tyre shoulder improves handling.

WinTech Van

For transporter and vans.

► Excellent snow traction and braking performance.

The WinTech Van absorbs lots of snow. The tyre interlocks with the snow and thus ensures excellent traction. In addition numerous gripping edges offers excellent braking performance on snow.

► Optimum aquaplaning safety.

When it rains, the profile disperses the water from the contact surface and optimise the aquaplaning safety.

► High mileage performance.

Due to the flat tyre contour the ground pressure is distributed evenly, increasing the mileage performance.
