Преимущества

Долговечность и точная управляемость Новая усиленная конструкция делает шины Goodyear более легкими и прочными. Их использование подразумевает снижение расхода топлива, оптимизацию износа протекторов и повышение плавности движения на поворотах.

Улучшенное сцепление При изготовлении шин Eagle F1 Asymmetric 3 используется новая адгезионная смесь GripBooster. Это обеспечивает лучшие характеристики торможения и управляемости для уверенного вождения при любых дорожных условиях.

Сокращение тормозного пути Благодаря технологии Active Braking UHP, эти шины лучше реагируют на торможение, автоматически увеличивая площадь соприкосновения с дорогой для улучшения сцепления с ее поверхностью. В чем преимущество? Сокращение тормозного пути на мокрых и сухих дорогах повышает безопасность и комфорт во время вождения.
