ALTIMAX ONE / ONE S

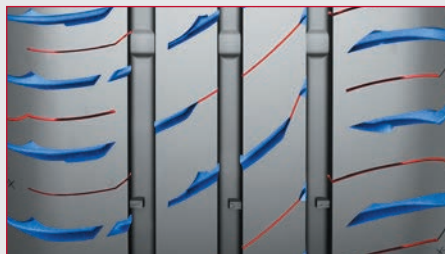

OWN EVERY CURVE, ENJOY CONFIDENT DRIVING PLEASURE

WELCOME TO GENERAL TIRE'S NEW PASSENGER SUMMER LINE.

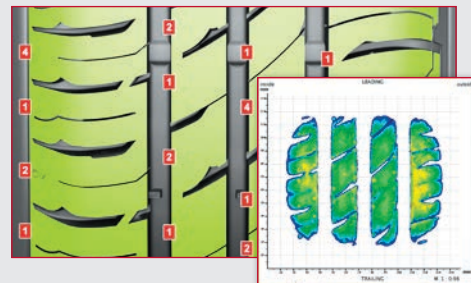

Adventurous on dry roads

This new tire is designed in a whole new way – its connected shoulder blocks with added stiffness provide precise steering response, powerful grip and safe, reliable braking performance for everyday driving.

Reliable in wet conditions

Optimized siping and a large number of gripping edges effectively displace water for responsive handling and enhanced control on wet and slippery roads.

Enjoy extra mileage

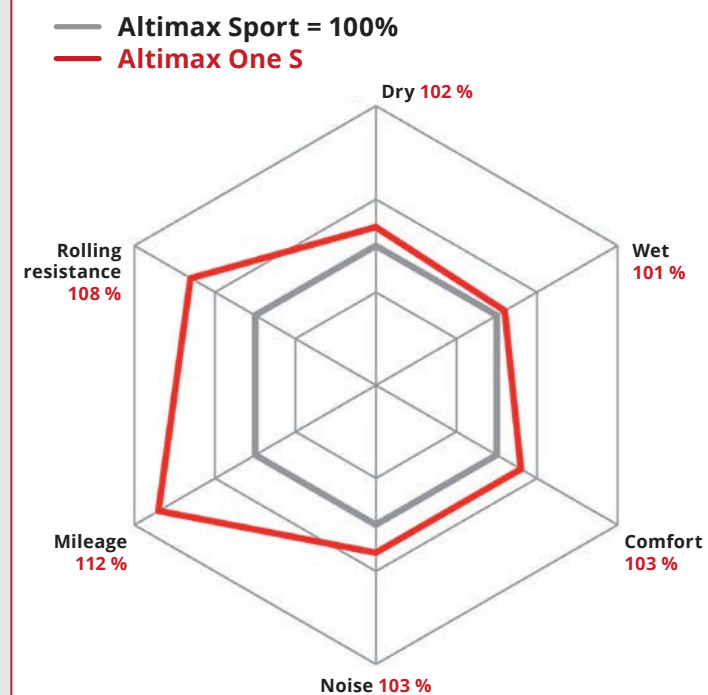

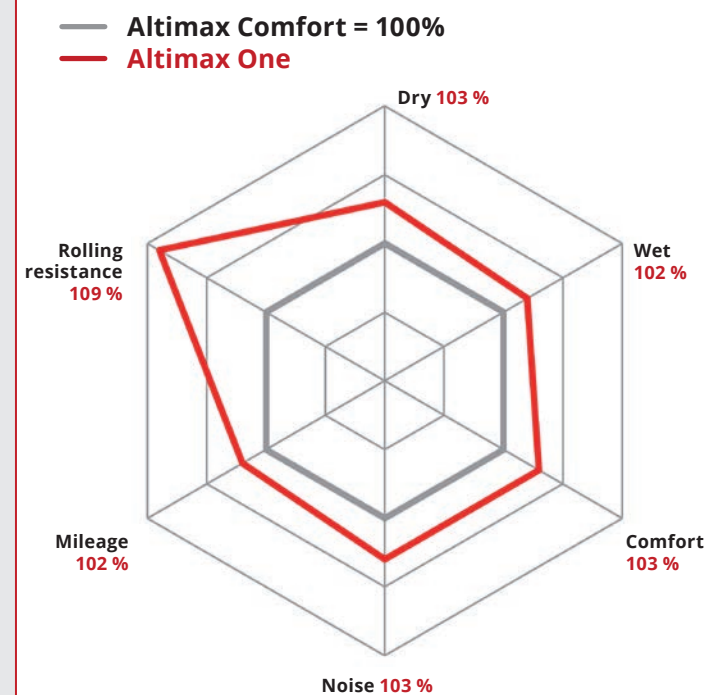

The new silica-enriched tread compound and the computer-optimized pattern design enable you to gather more miles thanks to minimized wear-causing distortion. Benefit from the extended tread life that leads to extra miles!

In addition to the 3-groove pattern, a 4-groove version has been designed in order to fit the higher performance sizes to ensure improved water evacuation at higher speeds and responsive handling. The sizes with 4-groove pattern are called „Altimax ONE S“.

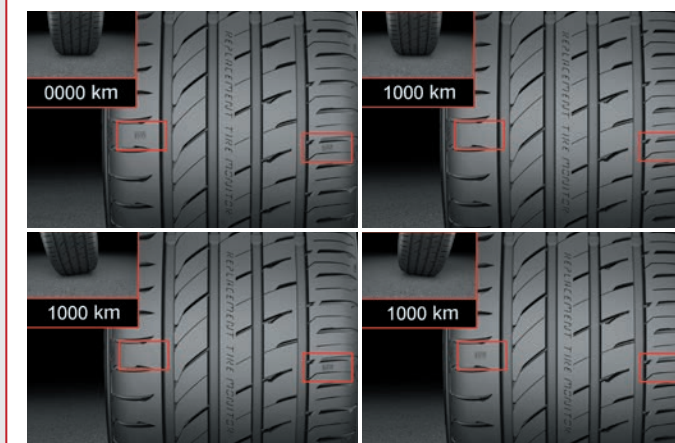

PERFORMANCE COMPARISON

GENERAL TIRE'S MONITOR TECHNOLOGIES

The **RTM (Replacement Tire Monitor)** provides the vehicle owner with added safety by clearly indicating when the tyres need to be replaced.

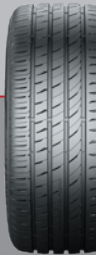

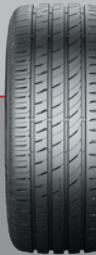

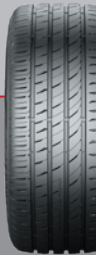

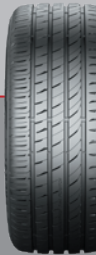

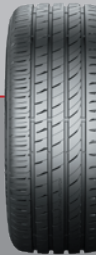

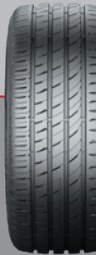

The **VAI (Visual Alignment Indicator)** helps detect mis-aligned wheels with an easy visual check that contributes to a longer tread life.
